

POLICY SECTION 3000 - STUDENTS

RESIDENCE AND SCHOOL ATTENDANCE AREAS

For purposes of this policy the residence of the parent, foster parent or legal guardian shall be considered the residence of the child.

Students who reside in the Olympia School District will generally attend the school which serves the attendance area in which they reside unless they have been given permission to attend another school in accord with the provisions of this policy or Policy 3131, Attendance Area Transfers.

Additionally, when the District determines that a student is homeless, as defined in Policy 3115, Homeless Students—Enrollment Rights and Services, that student will attend the school that, in the judgment of the District, will best meet the educational needs of the student. If the student who is homeless seeks to attend a school other than that described above, he/she will be allowed to attend a different school in accordance with Policy 3115. For the purpose of this policy and for enrollment records, the school assigned by the District will be considered the student's resident school.

As population and enrollment shifts occur within the District, it is necessary to make changes in school attendance areas or transfer students. By mid-May of each school year, the next year's estimated enrollment will be forecast for each school attendance area. In those cases where estimated enrollments are substantially in excess of class size guidelines, student transfers may be made in order to operate an effective and efficient educational program during the following year.

Mobility of families makes spring estimates somewhat tenuous. By the beginning of the second week of the fall term, any additional student transfers necessary to adjust class sizes will be undertaken.

The following considerations will be included when planning boundary changes and student transfers:

- 1) Priority shall be given to efforts to minimize the disruption of the student's established relationships with a school.
- 2) Efforts shall be made to maintain neighborhood integrity when making transfers.
- 3) Efforts shall be made to keep siblings in the same elementary school.
- 4) Racial and socio-economic balance shall be considered.
- 5) Efforts shall be made to accommodate anticipated growth.
- 6) Transportation efficiencies shall be considered.
- 7) Prior to the implementation of any planned transfer of students, parents of students involved in such planned transfer shall be invited to a meeting at which the planned change will be explained and discussed.
- 8) An orientation to the new school will be arranged for transferred students.
- 9) Priority shall be given to students who reside within a school attendance area over non-resident students.

The District reserves the right to base final decisions on the needs of all schools in the District. When fall enrollments in an attendance area substantially exceed class size guidelines, the students may be required to attend a school in another attendance area.

POLICY SECTION 3000 - STUDENTS
